

## MNRE-FICCI Conference Renewable Energy in India: Emerging Areas & Opportunities

### Thematic Week –Climate and Biodiversity

October 7, 2021; 14:00 - 18:20 hrs

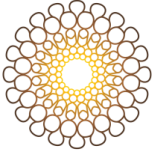

### DRAFT AGENDA

India is rapidly moving towards becoming one of the largest green energy producers in the world. As of August 2021, India's total renewable energy, excluding large hydro, installed capacity has crossed 100 GW and has a target of reaching 450 GW by 2030. During the last about seven years, India has witnessed one of the fastest rate of growth in renewable energy capacity addition among all large economies, with renewable energy capacity growing by three times and solar energy expanding by over seventeen times. India stands at 4th position in the world in terms of installed renewable energy capacity, 5th in installed solar energy capacity and 4th in terms of installed wind energy capacity.

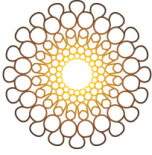

Dubai will host the World's largest business event from October 1, 2021 to March 31, 2022. The Expo is set to be an exceptional event that will celebrate humanity's resilience, creativity, culture, and innovation – including major technological advances across the industry. The Expo in Dubai will welcome more than 191 countries (including India), businesses, multilateral organisations, and educational establishments.

The Dubai Expo will commence with the 'Climate & Biodiversity Week', October 3 – 9 2021, with the India pavilion hosting events, running India stories, leadership engagements, events on themes of renewable energy, biodiversity and wildlife, climate change, and sustainability, and several entertainment and cultural shows during this week. The conferences will have presence of speakers, participants and thought leaders from Indian and Global companies.
